Automations I

- 2 Platforms Integrated to setup an automation between the two so extra steps aren't required.
- Custom Zaps created if there is no native integration between the platforms you are using.
- Use case testing to make sure all parts of your integration are working.

Example of systems would be connecting your email marketing platform to your website so users can get automated emails after filling out a form on your website.

Automations II

- 3 Platforms Integrated to setup an automation between the two so extra steps aren't required.
- Custom Zaps created if there is no native integration between the platforms you are using.
- Use case testing to make sure all parts of your integration are working.

Example would be connecting your email marketing platform and a CRM platform to your website for automated emails and automated customer tracking to meet business goals.
